

VIRTUAL INTELLIGENCE PROVIDERS, LLC VIP APPLICATION DEVELOPMENT SERVICES

"There is pride in knowing that all of your projects are coded and tested exclusively in the US at competitive rates, in our Virtual Project Environment, with quality and timely results"

Sonia Clayton, VIP CEO

Technology is the driving force behind international and domestic business expansion. To create and sustain an ongoing, productive IT culture within your corporation, VIP offers the following services:

- *Requirement Management- Application Development (definition & business process mapping)*
- *Systems Integration (between various applications)*
- *Application Security*
- *Data Integration with action scripts, screens and components*
- *Database Administration*
- *SQL, Oracle, Java, SEIBEL, ASP, .Net*
- *Web-based custom applications (e-Commerce Interfaces)*
- *EPSS-HELP (Electronic Performance Support Solutions) Simulated documentation created with VIP's state-of-art technology*
- *Website administration and maintenance with customized corporate image*
- *Intranets design, development and support*
- *Inter / Intranet & Software Security*
- *LMS Implementations*
- *Reporting System Applications*
- *COGNOS Business Intelligence*
- *OLAP Business Intelligence*
- *ERP Systems (SAP and JD Edwards) Implementation Support*

Support organizations are required to leverage any-and-all tools and expertise, such as integrators, developers, documentation experts; and even, Change Management. Without this high level of collaboration, projects risk low utilization and lower ROI.

Executives and decision makers need to determine how human collaboration can be applied to facilitate these support organizations. VIP personnel help your IT professionals be productive by ensuring that valuable knowledge is captured, leveraged and transferred from the support team to the rest of the company.

Give us a call, we will provide you with a free analysis and our recommendations!
