

VIRTUAL INTELLIGENCE PROVIDERS, LLC

SAP Basic Navigation Course

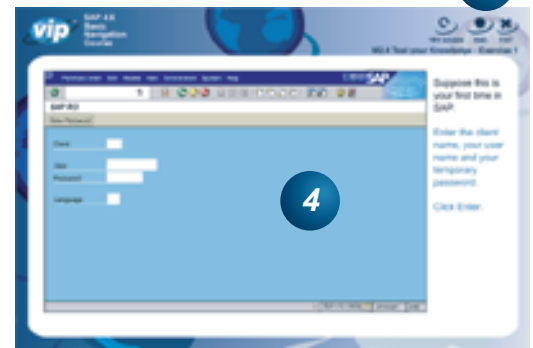

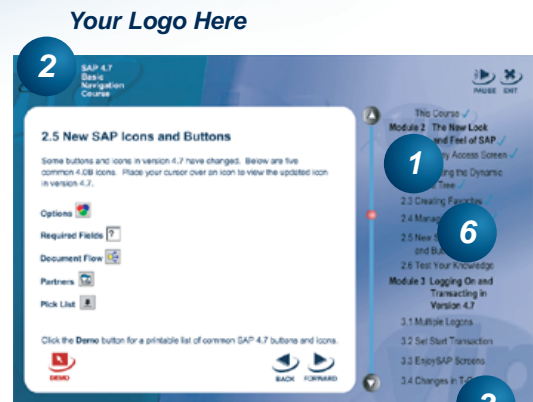

VIP-SAP Enterprise 4.6/4.7

SAP is an ERP system that is changing the way in which businesses fulfill their operations, facilitating a better flow of transactions and measuring the results of such processes. SAP has made this possible, but no system implementation will be successful if users are not trained or prepared.

The VIP-SAP course developed by Virtual Intelligence Providers, LLC has been designed for those corporations whose employees can learn and use the CBT (Computer Based Training) Programs in an efficient manner and at their own rhythm. It is an asynchronous web based training course to learn SAP Basic Navigation.

These are the differences that distinguish us from the competition:

- 1 Although the sequence of the course is linear, it allows for users who are familiar with a specific chapter, to skip ahead by using the sliding bar.
- 2 The navigation screen is fairly easy to use. It is the work of professional designers using state-of-the-art technology. Also this look and feel can be customized to fit any company's colors and/or logos.
- 3 The users may read and listen to the lessons simultaneously. Otherwise, they may suppress the sound by clicking on the button located in the upper right hand corner.
- 4 The simulations found within this course are a reproduction of the SAP R/3 environment. One feature that sets this course apart is that simulations all throughout may be adjusted to the size of any screen without affecting its resolution.
- 5 At the end of each chapter, users will have the opportunity to test their knowledge and verify progress in acquiring the concepts and skills taught by the course. This is done through "Test Your Knowledge" exercises. Fun and interactive exercises make the learning experience fun and engaging. Exercises like word search, memory games, drag and drop etc.
- 6 The content of this course is the most comprehensive and detailed on the market. It also contains a description of the SAP different modules and a glossary.

Disclosure:

At Virtual Intelligence Providers, LLC we offer corporate technical professional development training, and business-related courses, intended to improve and maintain top performance in the industry. In addition, we are not attempting to replace regular academic instruction nor do we represent a formal educational institution. VIP also provides instructors who are cross-trained and experienced SAP classroom trainers for organizations requesting classroom instruction combined with e-Learning solutions such as the VIP-SAP 4.6/4.7 course™.
